

1080 BAITING

PET OWNERS please take notice of all signs and protect your pets.

1080 BAITS WILL KILL DOMESTIC CATS AND DOGS

-  Aerial and ground baited
-  Ground baited only
-  Buffer areas not baited

The red and brown areas are ground baited with sausage meat baits containing 1080 throughout the year.

Aerial baiting will be carried out from 26 April to 3 May 2018 in the areas shown in red.

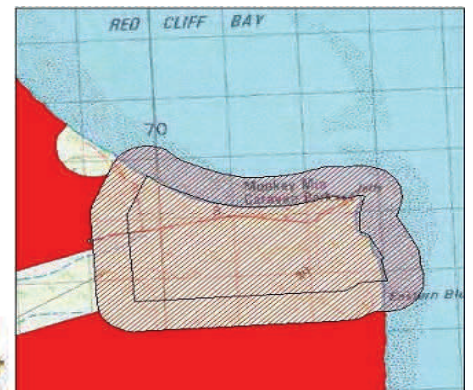

All baited areas should be considered toxic at all times as baits remain poisonous for long periods in this arid climate

Denham buffer zone

Although no longer baited, this area still has toxic baits from earlier baiting programs

Monkey Mia buffer zone

All baited areas are sign-posted from track entrances. **Please observe signs and protect your pets.**

Project Eden's work reducing cat and fox numbers in the area has resulted in significant increases in bilby, malleefowl and woma python numbers. The survival of these and other native animals depends on continued cat and fox baiting

For further information contact the Parks and Wildlife Service in Denham on 9948 2226 or visit sharkbay.org.
