

# Return to 1616 Animal Factsheets

Find the key facts for each of the *Return to 1616* animals from the [Animal Factsheets](#) including the: greater stick-nest rat, chuditch, heath mouse, western grasswren, Shark Bay bandicoot, Woylie, banded hare-wallaby, Shark Bay mouse, rufous hare-wallaby, brush-tailed mulgara, boodie, desert mouse, and dibbler.

### Greater stick-nest rat

*Lagotis maculosa*

**CD**

**Quick facts**

Head body	110-160mm
Tail	140-180mm
Average weight	80-100g
Gender	40:60
Number of young	1-4
Gestation	4 weeks

**Conservation Status**

Least concern (LC) - This species is not considered to be at risk of extinction. It is common in its range and is found in a wide variety of habitats.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Chuditch (western quoll)

*Dasyurus hallucatus*

**VU**

**Quick facts**

Head body	200-300mm
Tail	200-300mm
Average weight	6.5-9kg
Gender	1:1
Number of young	2-6
Gestation	1-1.5 months
Lifespan	4-5 months

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Heath mouse

*Pseudomys penningtoni*

**VU**

**Quick facts**

Head body	90-130mm
Tail	80-100mm
Average weight	35-50g
Gender	3:4 female
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Western grasswren

*Amphispiza bilineata*

**P**

**Quick facts**

Head body	100-130mm
Tail	80-100mm
Average weight	35-50g
Gender	3:4 female
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Least concern (LC) - This species is not considered to be at risk of extinction. It is common in its range and is found in a wide variety of habitats.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Shark Bay bandicoot

*Peramecus kangarooensis*

**VU**

**Quick facts**

Head body	100-130mm
Tail	80-100mm
Average weight	35-50g
Gender	3:4 female
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Banded hare-wallaby

*Lagotis fasciata*

**VU**

**Quick facts**

Head body	400-600mm
Tail	230-300mm
Average weight	1-2.5kg
Gender	1:2.5kg
Number of young	30-50
Gestation	1 month

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Shark Bay mouse

*Pseudomys shawi*

**VU**

**Quick facts**

Head body	80-110mm
Tail	110-120mm
Average weight	30-50g
Gender	30:70
Number of young	3-4
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Rufous hare-wallaby

*Lagotis leucurus*

**VU**

**Quick facts**

Head body	200-300mm
Tail	200-300mm
Average weight	1.5-2kg
Gender	1:1
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Brush-tailed mulgara

*Dasyurus setifer*

**P**

**Quick facts**

Head body	100-130mm
Tail	80-100mm
Average weight	40-110g
Gender	30:70
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Least concern (LC) - This species is not considered to be at risk of extinction. It is common in its range and is found in a wide variety of habitats.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Boodie (burrrowing bettong)

*Bettongia lesueur*

**CD**

**Quick facts**

Head body	300mm
Tail	250mm
Average weight	1.8kg
Gender	3:4 female
Number of young	2-6
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Least concern (LC) - This species is not considered to be at risk of extinction. It is common in its range and is found in a wide variety of habitats.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Desert mouse

*Pseudomys desertorum*

**S**

**Quick facts**

Head body	60-100mm
Tail	40-70mm
Average weight	15-20g
Gender	2:1
Number of young	1-3
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Least concern (LC) - This species is not considered to be at risk of extinction. It is common in its range and is found in a wide variety of habitats.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.

### Desert quoll

*Dasyurus geoffroii*

**VU**

**Quick facts**

Head body	140-180mm
Tail	120-150mm
Average weight	80-120g
Gender	40:60
Number of young	1-4
Gestation	1-1.5 months
Lifespan	1-2 years

**Conservation Status**

Vulnerable (VU) - This species is at risk of extinction in the wild. It is found in the coastal heath and scrub of the south coast of Western Australia.

**OS CD VU EN CR EX**

**DID YOU KNOW?**  
This species is found in the coastal heath and scrub of the south coast of Western Australia.
